

**Important change to our products that are sold as card of 5**

As from 17<sup>th</sup> October 2022, Powercell will updating our “sales unit of measure” for all of our products that are sold as card of 5. This is intended to provide consistency with our other carded product lines, in terms of naming convention, sales units and pricing.

These models will now be sold as a card of 5 and not per battery. All of our systems and associated materials (website, invoices, price lists etc.) will be updated to reflect this change. We will now be publishing pricing and price lists, as well as accepting orders and invoicing out as a card of 5 (5 batteries = 1 sales unit of measure).

A number of our card of 5 product codes will change as follows, to ensure these products are consistent and easily identified. Please update your product list\* accordingly

Old code	New code	Old price	New price
GP186	GP186AC5	Per battery	Card of 5 batteries
GP189	GP189AC5	Per battery	Card of 5 batteries
GP76A	GP76AC5	Per battery	Card of 5 batteries
GP23AC5	No change	Per battery	Card of 5 batteries
GP2032C5	No change	Per battery	Card of 5 batteries
GP27AC5	No change	Per battery	Card of 5 batteries

- Order unit of 1 = card of 5 batteries
- Listed prices are for a card of 5

**When ordering any  
items sold as card of 5**

**ORDER PER CARD  
NOT PER BATTERY**

Order unit 1 = 5 Batteries  
Order unit 2 = 10 Batteries  
Order unit 10 = 50 Batteries

For example:

To order 20 x GP23AC5 batteries and 20 x GP76A batteries on or after 17-October-2022,  
please order as follows:

4 x GP23AC5

4 x GP76AC5

There will be no change to the prices for these items, but from the 17th October 2022, these products  
will be priced per card of 5 (there will be some minor variations as a result of rounding.)

If you have any queries relation to this change, please contact us via [sales@powercell.com.au](mailto:sales@powercell.com.au) or call  
us on 08 8223 2011.

Regards

Powercell Team
